

# THE RANTERINO IS NOT A MEATEATER

(A very meaty tongue-twister)

What is the Ranterino?  
Well, that's difficult to define.  
From where and whence he came  
There is no certain sign.  
But there are certain things  
We certainly can know  
About this purple creature  
Called the Ranterino.

The Ranterino is a meat eater not a plant eater.  
I think that's right, I'm sure.  
Or is the Planterino an eat meater, not a rant eat?  
Or is that not right at all?  
Maybe the Meaterino is an eat pleater  
And not an ant eater after all.  
All of a sudden I sense  
I'm not so sure at all.

After thinking about this further  
I know only one thing for sure...  
The Eaterino most certainly  
Isn't a pleat meater or rant eater at all.

So, what is the Ranterino?  
Well, let's be honest,  
We really don't know...
